ATTENTION PARENTS: NEW IMMUNIZATION REQUIREMENTS MENINGOCOCCAL VACCINE

Public Health Law Section 2164: *Effective September 1, 2016 all public and private school students entering grades 7 and 12 in New York State must be fully vaccinated against meningococcal disease in order to attend school.*

- One dose is required before 7th grade. If your child had the 1st dose as a 6th grader or earlier, another dose is NOT required until 12th grade
- Two doses will be required before 12th grade. If your child received their 1st dose on or after their 16th birthday, they will NOT need a 2nd dose (booster) to enter 12th grade

Vaccine required to meet school requirements: MenACWY or MCV4–Menactra and Menveo

NOTE: Proof of immunizations **MUST** be submitted to the school health office no later than September 1, 2016. Your child will **NOT** be allowed to start school without the appropriate immunizations on file.

What is Meningococcal Disease?

Meningococcal disease is a rare but dangerous disease that strikes healthy young people without warning. It can cause meningitis and sepsis. Meningococcal infections can be treated with antibiotics. But, even with treatment, about 10-15% of people who get sick will die. Another 10-20% will survive but suffer lifelong disabilities such as hearing loss, loss of arms or legs or brain damage.
